## PROFILE

Full Stack Developer with a university technical degree in programming and experience building web and mobile software for businesses. I turn operational needs into software solutions—from requirements discovery and architecture design through implementation, testing, deployment, and production maintenance. I combine full-stack development with project management, coordination across business teams, and process improvement.

---

## EXPERIENCE

### Gili / Giliycia SRL

Oct 2025 – Present

*Development Lead · Software Development and Project Management*

- Set technical standards, architecture, and roadmap; prioritize requirements with users and internal teams, and coordinate vendors to digitize operations.
- Design and build tools for order picking, logistics and freight settlement, showroom queue management, B2B portals, ticketing, and catalog automation.
- Integrate internal systems with Flexxus and Magento; manage the full lifecycle from requirements through deployment, server operations, and production maintenance.

### Food Partners Patagonia S.A. · Xenova project

Sep 2025 – Present

*Full Stack Developer · Cross-Functional ERP*

- Develop a comprehensive ERP for a seafood-processing company, tracing Argentine red shrimp from vessel unloading at port and raw-material intake and weighing through washing, freezing, production lines, palletizing, orders, and container exports.
- Develop production and quality modules with controls and reporting; include a cold-storage facility map, inventory, lot and pallet traceability, inter-plant stock transfers, and foreign-trade documentation.
- Develop HR modules and an installable employee self-service PWA for personnel records, clock-ins, hours, leave and vacation, supervisor and HR approvals, PDF payslips, internal communications, and disciplinary workflows.
- Build a REST API in Laravel/PHP and independent React/TypeScript applications by business area, with authentication, granular access control, per-plant database selection, and real-time error monitoring.

### Xenova · Selected Freelance Projects

2025 – Present

- **Catalejo Travel:** a catalog of travel experiences and excursions with seasonal pricing, a CMS, and WhatsApp inquiries to support trip planning.
- **Quinta Pata (5ta Pata):** a pet healthcare plan provider offering a platform for enrollment, pet records, Excel imports, and verifiable QR membership credentials.
- **Inspira Ingeniería:** a corporate website with a secure project administration panel, forms, and content management.
- **Madryn Buceo:** a corporate website and reservations and management backend, developed through Scrum.

---

## TECHNICAL SKILLS

**Development:** TypeScript, JavaScript, PHP, Python, Java, C#; React, Next.js, Laravel, .NET, Spring Boot.

**Mobile and data:** React Native, Expo, Flutter; PostgreSQL, MySQL.

**Infrastructure and delivery:** Linux, servers/VPS, Docker, Docker Compose, CI/CD, Git, AWS; Claude Code, Codex, and OpenCode.

---

## EDUCATION AND LANGUAGES

### University Technical Degree in Programming

Universidad Tecnológica Nacional (UTN)

2021 – 2024

**Spanish:** Native · **English:** B1 (Intermediate)
