

MAXIMO OZONAS

Development Lead | Full Stack Developer | University Technician in Programming
Bahía Blanca, Buenos Aires, Argentina | (+54) 9 291 419 4663 | maxiozonas10@gmail.com | linkedin.com/in/maximoozonas

PROFESSIONAL PROFILE

Development Lead and Full Stack Developer with experience building software end-to-end: requirements gathering, architecture design, development, deployment, and production rollout with DevOps practices. Led the creation of the IT area of an operating company and developed a comprehensive ERP for an industrial company. Resourceful and autonomous profile, focused on generating real impact on business operations.

PROFESSIONAL EXPERIENCE

Development Lead October 2025 – Present
Giliyca SRL – IT Area

- Lead software development for the company's IT Area, recently created, defining technical standards, architecture, and systems roadmap priorities.
- End-to-end responsible for the software lifecycle: requirements gathering, design, implementation, and production rollout with DevOps practices (CI/CD, Docker, automated deployments).
- Development and maintenance of web platforms and internal systems that support critical business operations.
- Technical coordination with external providers (incidents, tickets, and integrations) and cross-functional work with company areas to translate operational needs into technical solutions.

Software Developer September 2025 – Present
Food Partners Patagonia S.A.

- End-to-end design and development of a custom ERP that centralizes the operation of all company areas: production, quality control, stock and material consumption, complete traceability of the production process, and reports for decision-making.
- Backend with Laravel 11 and hexagonal architecture: scalable RESTful API, JWT authentication, and role-based access control (Spatie Permission) with differentiated permissions by area.
- Complex relational database modeling in PostgreSQL with UUIDs, designed to guarantee the traceability of every record of the production process.
- SPA frontend with React 18, TypeScript, and Vite; automated deployments with Docker Compose and technical API documentation for integration between teams.

PROJECTS

Corporate Website – Inspira Ingeniería (Freelance) August – September 2025
Next.js, TypeScript, Prisma, Cloudinary

- Complete development of a corporate site with App Router, secure administration panel (Prisma, API Routes), SEO and performance optimization, and form security (rate limiting, honeypot).

Website and Booking System – Madryn Buceo (Freelance) 2025
Next.js, React, TailwindCSS, Spring Boot

- Development of the corporate site and a management and booking system with a Spring Boot backend, managed with Scrum from client requirements gathering to delivery.

EDUCATION

University Technician in Programming — National Technological University (UTN) | 2021 – 2024

High School Diploma in Economic Sciences — Colegio Claret, Bahía Blanca | 2006 – 2017

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C++, PHP, SQL, HTML, CSS

Frontend: React, Next.js, Flutter, TailwindCSS, Vite

Backend: Node.js, Laravel, Spring Boot, PostgreSQL, RESTful API

DevOps: Docker, Docker Compose, CI/CD, AWS, GitHub, Linux, Windows, Virtual Machines

Practices: Hexagonal Architecture, Testing, Scrum, Technical Documentation

LANGUAGES

Spanish: Native | **English:** Intermediate (B1)
